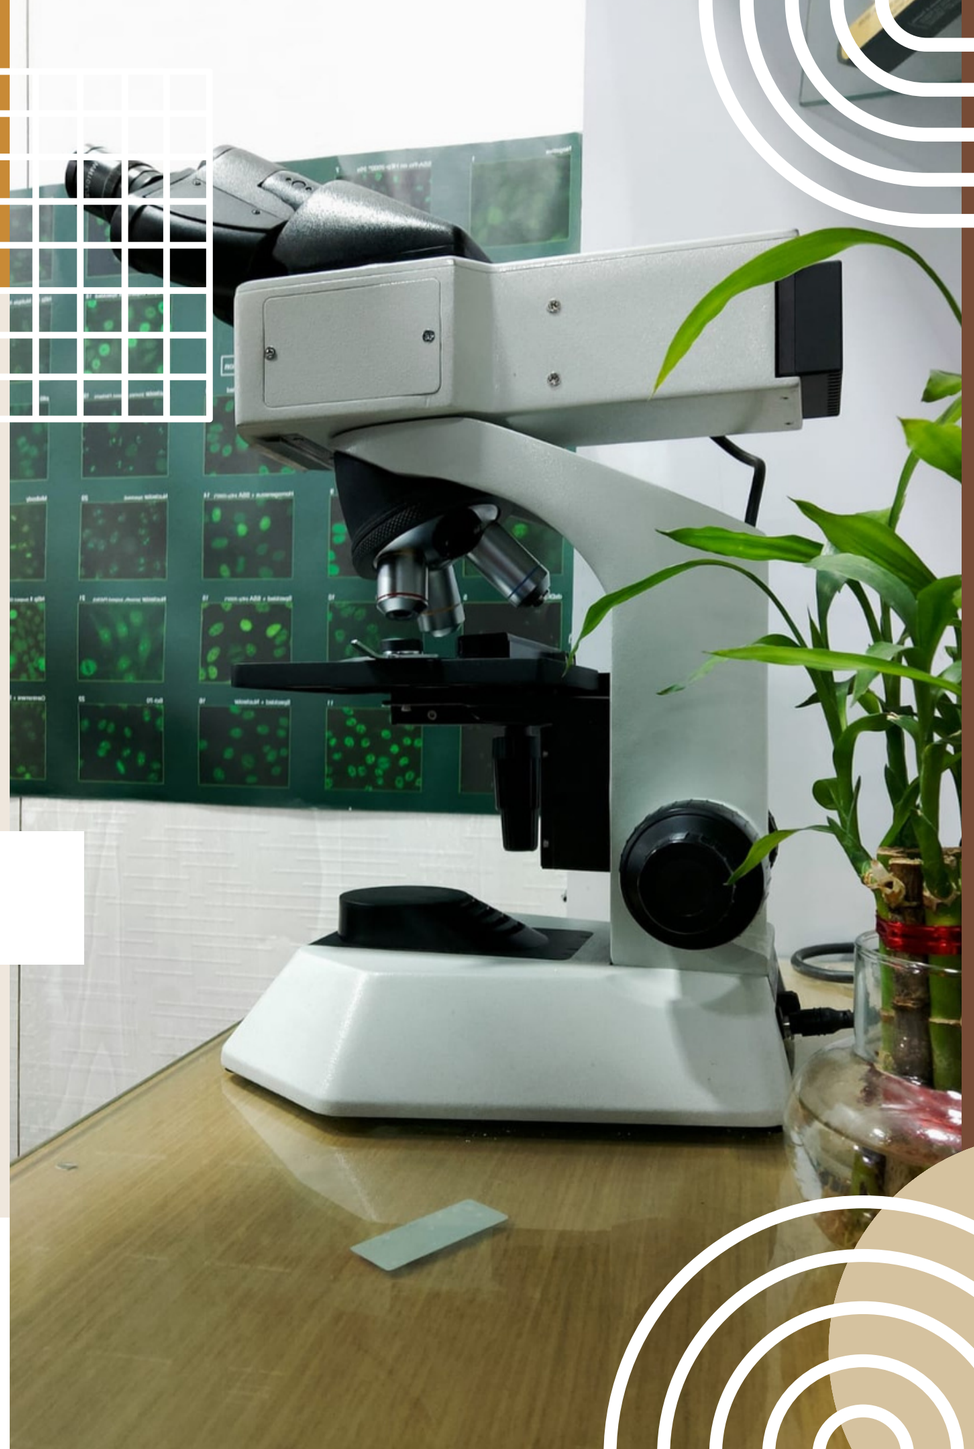
+91 9953001594



About Us

Their goal is to provide high-quality laboratory testing services that are convenient, economical, and accessible in order to improve the standard of healthcare. Modern tools and technologies are employed to guarantee the precision and dependability of their test results.

Our Testing Services

One of the Borcelle Senior Services commitments is the necessary and crucial medical screenings the senior citizens need to take routinely.
As they age, they are prone to developing various health conditions.

Our Packages

1. Liver Function Tests
2. Cholesterol Tests
3. Corona Virus Test
4. Kidney Function Test

Liver Function Tests

- Liver function tests (LFTs) are a series of blood tests that are used to assess the health and function of the liver.
- These tests are often ordered together to provide a comprehensive assessment of liver function.

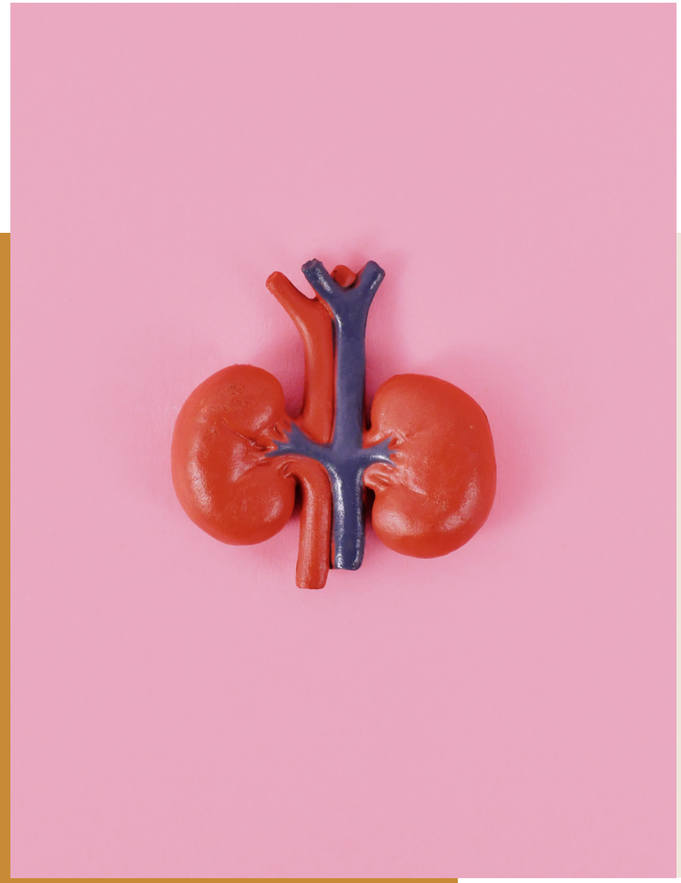
Cholesterol Tests

- The level of cholesterol in someone's blood can be determined using cholesterol tests, which are medical procedures. strokes, or other heart diseases
- Cholesterol is a form of fat that is necessary for the body to function properly.

Corona Virus Tests

- Coronavirus tests are diagnostic procedures used to identify whether a subject is currently infected with a coronavirus.
- Molecular tests (such as PCR tests) and antigen tests are the two primary categories of COVID-19 tests.

Kidney Function Test



- Creatinine blood test
- Blood urea nitrogen (BUN) test
- Glomerular filtration rate (GFR)
- Urinalysis
- Albuminuri
